

BEGINNING MACHINE EMBROIDERY

Instructor: Mark Palmer

Do you have an embroidery sewing machine but just never got around to learning the basics of machine embroidery? If so, then this is the class for you. You can turn an inexpensive shirt or jacket (even from a thrift store) into a custom work of art. Use colors to match an outfit or add fabric for an appliqué. Or just use embroidery to make quilt squares or label your quilts. You can use a downloaded pattern or use one built into your machine. Patterns on the internet are

amazingly inexpensive.

We will cover the basics of different threads and stabilizers and how to mount shirts and fabrics in a hoop.

My embroidery machine is a Husqvarna-Viking so that is the machine I am most familiar with. If you have another brand please email me and I will try and get a basic lesson on your specific machine, but this is NOT intended to be a machine specific class.

Class is 3 ½ hours, fee is \$35. My email is chi3palmers@gmail.com.

I will email specific class requirements when you contact me with what brand of machine you have or call me at 509 554-3796
